What have we done?

- We put endpoints in YAML format.
- Everybody made sure they could run the project on their computers.
- We created more issues and milestones.
- We discussed our endpoints, class structure and finalized our thoughts.
- We had a meeting with group 09-c and 09-a.

What should we discuss further?

- How should we do the work allocation?

What should we do next?

- Start working on the methods for API specification.
- Buddy Check
- Agree on 1 significant main feature for each member (.pdf) of your team.
